

Streamlit

Want to take your Python skills to the next level? [Streamlit](#) is an open-source Python library that makes it easy to share and build custom web apps for machine learning, data science, and more. Instead of writing Python scripts without a UI, you can create a beautiful web app, complete with widgets and data visualizations, and [deploy it for free to the Streamlit Community Cloud](#). You can even build a fully functional LLM-powered app with just 25 lines of code! Hack with Streamlit this weekend for your chance to win some awesome tech hardware for you and each member of your team.
